

Central Lab Services at Worldwide Clinical Trials

With over 30 years as a market leader in Clinical Conduct and Bioanalytical Services, Worldwide Clinical Trials offers comprehensive Central Lab Services. Our Central Laboratory, housed within our Clinical Pharmacology Unit, provides access to shared expertise and resources. The facility boasts full laboratory capabilities and dedicated laboratory space, and is CAP accredited. Our staff includes qualified medical technologists and technicians, and we offer specialized pediatric sample capabilities. Additionally, our lab is equipped to receive samples seven days a week, ensuring timely and efficient processing.

Support Services

- ✓ Utilize state-of-the-art instrumentation coupled with identical analytical platforms
- ✓ Provide full-service laboratory testing with expansion capabilities as needed
- ✓ Maintain additional external lab relationships to allow for send-out testing if required
- ✓ Have a local Pathologist/Medical Director available to answer laboratory assay technical questions
- ✓ Feature a dedicated team with the Central Laboratory Study Manager as the primary contact for all studies
- ✓ Operate an on-site pharmacy with the central lab to accommodate pharmaceutical additives needed for tubes

Key Advantages

Central Lab Key Services

- Equipped to receive samples 7 days a week, ensuring timely and efficient processing.
- Specialize in pediatric sample capabilities.
- Central Laboratory Study Manager serves as the single point of contact.
- Process and ship both supply and resupply kits within 3 business days from the initial request.
- Utilize the ClinSpark® eSource platform for real-time, secure data access, and electronic end-to-end laboratory sample processing, enabling direct entry of sample details and bypassing the need for paper-based request forms or manifests.
- Offer full lab visit kit creation capability, with kit inventory electronically controlled per study.
- Provide an electronic customer ticketing interface available 24/7/365.
- Conduct full data review, including database query entry, with fully compliant data transfer available in a choice of formats.
- Operate under an environmentally sustainable green initiative, reducing material waste.
- Manage routine safety testing, pathology services, bioanalytical services, and biomarker analysis.
